

QR code instructions for Garage Paystation:

- When exiting, the guest will put the ticket into the paystation, and wait for the dollar amount to show up on the screen (as if they were paying cash).
- **When the dollar amount shows on the screen, the guest will hear a click.**
- The guest will hold the QR code of the validation in the box on the lower left side of the paystation. This box has a red glow which comes from the laser that will scan the QR code. **They will hold it there for approx. two seconds until they hear a loud click.** This click signifies that the validation was read, and the gate will raise and the guest is free to leave.

* If at any time they should need assistance, they may press the call button, which is labeled "press for help".
